Attorney Candidate Snapshot:

Anonymized - February 16 2026

Candidate	Anonymized
Location	**Greater Dallas**
Experience Context	Litigation support, insurance coverage, eDiscovery (Texas licensed)
Work Model	Open to in-office or hybrid
Compensation Expectations	$45-$65/h - flexible on scope
Availability	Requires 3 weeks notice

Summary

- 15+ years supporting complex civil litigation across insurance coverage, product liability, class action and personal injury matters.
- Recent track record as a litigation project attorney handling high-volume document review, privilege and factual issue spotting for large matters.
- Prior associate experience including plaintiff-side personal injury litigation and civil defense work.

Core Capabilities

- Research and writing for motions, briefs and appeals (civil lit.)
- Insurance coverage analysis: policy language, endorsements/exclusions and fact pattern application.
- Discovery management: drafting discovery, privilege review, deposition and expert support.
- Matter support across multiple cases

Representative work

- Led high-volume eDiscovery workflows across Relativity and other review platforms: built review protocols, managed reviewer teams, and supported preservation, collection, requests, and productions involving millions of pages.
- Ran discovery on complex litigation including property coverage disputes and product liability, with hands-on responsibility for depositions and arguing discovery motions in federal proceedings.
- Worked closely with technical experts to shape discovery strategy, draft and analyze expert materials, and prepare testimony in high-stakes matters (including arbitrations and sophisticated liability cases).
